NOTES:

1. Column 2 is the date of the last strike against target on which a BDA report was submitted.
2. Columns 3 and 5 assume that early warning allowed population ample time to take protective measures.
3. Columns 4 and 6 assume no protective measures taken by population in target area.
4. Number of sorties and amount of ordnance expended against each target are totals of data reported on OPREP's. Ordnance carried by aircraft in some instances is expended against more than one target therefore some error could exist in totals.
5. In some cases the pilots report all ordnance on target and actual analysis of photography indicates that only a fraction of reported ordnance can be accounted for in the target and spillover areas.
